

# Exception Handling

Saturday, February 22, 2025 10:42 AM

connect = 

→ cannot afford code to break in production.

Two Type of statements

→ normal } source file

int a = 5;

{
   
 → normal }
   
 → critical }

(a/b)
   
 open

might or might not
   
 fail.

try {
   
 { critical } -
   
 catch ... ) {
   
 }

⊕ Parent exception can never be caught before
   
 a child exception.

# finally

try {
   
 ↓
   
 try-catch
   
 try-finally
   
 try-catch-finally.

# throw

# throws → function name

func 1 throws —
